Greyhound safely skis the slopes this winter

As winter officially begins and the mountains become covered in snow, [Greyhound Australia](#) is helping skiers travel to the slopes cost efficiently and hassle free.

Chief Executive Officer Robert Thomas suggested snow lovers utilise Greyhound's regular services that run direct to Jindabyne, the ski-tube and Thredbo.

"Why bother with the hassle of driving when you can sit back and enjoy the spectacular scenery, relax and enjoy the luxury of the Greyhound coach," Mr Thomas said.

"Greyhound coaches are fitted out with all the appropriate safety equipment, including snow chains and by catching a Greyhound coach you are making the roads increasingly greener by reducing the number of cars travelling to the ski fields.

"Each coach is also equipped with state of the art technology including internal heating, fog free windows and comfortable seating.

"Greyhound coaches also have ample storage in the luggage compartment to carry all your extra ski equipment including skis, snowboards, boots and clothing.

"Passengers can also take advantage of Greyhound's amazing Mates Rates offer. If you purchase one ticket you will receive a phenomenal 50% off the second ticket and for groups of three or more you will receive 25% off each additional ticket."

Mr Thomas said to maximise skiing time those who purchase a ticket to Thredbo will have their park entrance included in the ticket price, so you can jump off the coach and hit the slopes straight away.

"Catching a coach is also the green way to travel with Greyhound being one of the most environmentally efficient travel operators in Australia," he said.

"When compared to jet aircraft, it has been found one full coach has five times less CO2 emissions per passenger, per kilometre on the same route.

"Greyhound also gives passengers the option of reducing the impact of their trip by carbon offsetting their travel through the [travel green](#) program.

"The carbon offset program supports Kyoto compliant green projects that help reduce carbon dioxide emissions throughout the world."

Greyhound has been safely taking people around the country for more than 100 years and is now the only national coach company operating in Australia after the acquisition of other coach brands such as McCafferty's, Pioneer and Bus Australia.
